## A Touch of Glamour

Glamtec is a 'non-repetitive' wall-covering, designed for water-contact environments. This lightweight ceramic allows for the creation of seamless scenes designed for longevity and practicality. It is waterproof, anti-bacterial, easy-clean, scratch-, shock- and fire-resistant.

Each mural is made to order, composed from individual sections of super-slim ceramic, ranging from 10 x 10cm up to 100 x 300cm. Designs can be bespoke and original or selected from Glamora's existing portfolio. Glamtec's light and super-slim construction means 'hanging' on any wall type is possible, including upon pre-existing coverings, such as tiled or stone-clad.
